

# Application for Financial Aid (rev. 2008)

COUNTRY: JORDAN

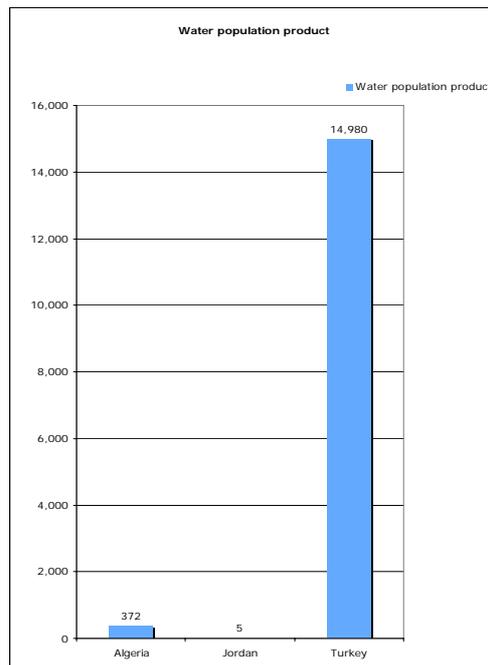

## I. DATA TABLE

Population	5 million
Area	92 thousand square kilometres
Water Available	1 billion cubic metres

## II. RATIONALE FOR APPLICATION

We have by far the smallest **water-population product** (water available × population).

Jordan has a much smaller water population product than our friendly neighbors in Turkey and Algeria. Because water and people are both resources, this water population-product measure was developed by our economists as a way to measure a country's most valuable resources. Clearly Jordan most deserves the WWRB aid.
